--- Lunch break ---

Session 2: 14:00 – 15:30 Use Case with Python

Professor Ronen Feldman (HUJI)

--- Short break ---

Session 3: 16:00–18:00 NLP for Hebrew language sources

Professor Yael Netzer (BGU)

To be held at Bar-Ilan university

Register via the IDS I [site](#)

NLP has become a versatile research tool in a growing range of disciplines and applications. The current workshop is designed to expose researchers in the social sciences and humanities to the latest developments in the field, and to give them some hands-on experience using the latest tools. For part of the workshop, some experience with Python programming will be useful. For those who want to try for themselves, bring your laptop. Software and python packages will be sent before the workshop.

Attendance is free, but registration is required.

Audience: Research faculty and research students in the social sciences and humanities who wish to use up-to-date Natural Language Processing methods in their research domains.

Registration required, places are limited: Register [here](#)
